Always improving

Update cycle for continuous improvements.

Parys Technografx Ltd has been established in software development for over 20 years. Production of the VNC Pocket office software has been in constant development for over 10 years and on numerous platforms from Microsoft smartphones to Compaq and Symbian devices. This has all culminated in our latest product on the most premier of devices the Apple iPhone and iPad.

With the fast processing power of the A5/6 chipset and the Retina display system the iPad 3/4 is now the optimum platform for our VNC Pocket Office software.

The VNC processing engine can be licensed and is found in other prominent VNC software packages such as Single Click's CONNECT. Medical apps like Real time remote Ultrasound.

VNC Pocket Office Pro Universal is available at iTunes.
